+1-647-778-8174

Executive Summary

Accomplished leader in software engineering, passionate about optimizing software organizations according to industry best practices and standards. Extensive experience building strong, healthy teams and implementing innovative processes within individual teams and organization wide.

Work Experience

Director, Software Engineering

Toronto, ON

Points (a Plusgrade Company)

2021 - Present

Oversaw the growth, development and wellbeing of 30+ software engineers and engineering leads, providing direction alongside the product team and other stakeholders.

- Drove technical advancement through goal setting based on industry best practices (DORA metrics), internal assessments improve the health of our services, establishing architectural direction, and rolling out critical improvements in observability and testing.
- Successfully led organization-wide initiatives including a centralized Notion documentation platform serving 500 employees; 10% development days to focus on innovation and personal development; and developed a comprehensive growth assessment rubric.
- Developed strong, healthy engineering teams by taking decisive action and providing innovative tools and processes to optimize recruitment and onboarding.
- Made significant contributions in establishing and optimizing the budget for engineering teams, ensuring a healthy balance of engagement, rewarding compensation and balanced internal equity.
- Actively involved in community building, organizing 100+ person socials, hosting meetups for local groups, and providing mentorship and coaching opportunities.

Tools: Notion, G-Suite, TypeScript, Python, Golang

Team Lead

Toronto, ON

Points

2019 - 2021

Established and developed a strong software development team in collaboration with other scrum leads.

- Established and grew a performant, psychologically safe engineering team.
- Contributed to sprints through Code Reviews, QA, piloting new patterns.
- Introduced innovative processes and contributed extensive documentation to provide the team more autonomy.

Tools: TypeScript, React, Python, CouchDB, Jira, G-Suite

Software Developer

Toronto, ON

G Adventures

2015 - 2019

On a team of 40+ software developers, maintained several business-critical products, including the website, the agent portal and the email dispatch system.

- Using Django and Postgres, maintained the email dispatch system used to communicate automated booking information to travellers
- Built UX enhancements across the global website, including the online booking system, which handles hundreds of transactions daily.
- Created extensive frontend tooling for React, Redux, multi-env Webpack, resulting in improved local development, optimized web calls and quicker delivery time.
- Through the role of Tech Ambassador, coordinated several meetups of 60-150 people, arranged sponsorship for several conferences and facilitated multiple site visits for the local code academy, Bitmaker.

Tools: Python, Django, Flask, Postgres, React, Trello

PHP Developer, System Administrator

London, UK

KoffeeCup

2011 - 2014

Primary backend (PHP) developer for a small digital agency with a development team of 3-6 people. Built a number of digital marketing platforms, a few standalone websites and maintained the AWS system infrastructure.

- A crowd funding site for local businesses
- A social networking site for local charities to assist those in need
- 2 Facebook pages that create compiled images / videos based on scraped Facebook images

Tools: PHP, JavaScript (jQuery), bash, deployed on a LAMP server.

Education

BSC. Comp Sci & Business Admin, 2011

St. Mary's University, Halifax NS

Projects

Hackathon Command Centre

High performance voting system for custom voting needs. Deployed on demand.

Built using SvelteKit, TRPC, PicoCSS, Postgres (PrismaDB).

Tendee

tendee.co

Scheduling app specializing in recurring events, for sports teams or recurring meetups. Provides intelligent email reminders using Postmark and recurring billing using Stripe.

Built using React (NextJS), GraphQL, Postgres, Express, Github Actions.

Showboard

showboard.ca

Collaborative bookmarking, content archival, and notetaking tool. Similar to Pocket, but the content is editable. Includes image resizing and management, Quill editor, drag and drop, one-time-auth.

Built using SvelteKit, TRPC, PicoCSS, Postgres (PrismaDB).

Volunteer Work

Katimavik	2005
<ul style="list-style-type: none">• 40 hours per week of volunteer work over 3 terms in Saskatchewan, Newfoundland, and Ontario for a period of 7 months.• Additionally, the following workshops were involved: committee work, conflict management, financial planning, entrepreneurial skills, environmental awareness, French classes and healthy lifestyle classes
